

Vertical press for wheels with flange

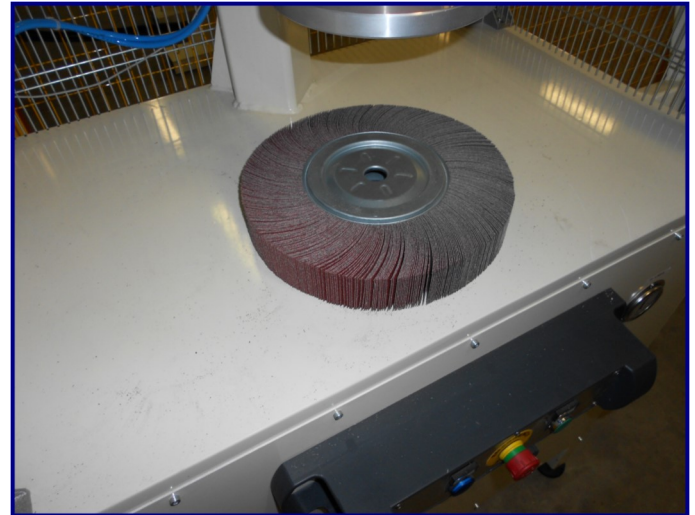

Model: SMA-FV

This equipment provides an automatic working process for the pressing of cloth wheels with flange.

It is designed to guarantee a perfect parallelism between the two flanges of the flap wheel.

It can be integrated with the SMA-TFT machine.

Specifications

Productivity:

6 pcs/min

Size and weight:

1000x1000x1800 mm

400 kg

Power and consumption:

Voltage 230V

Frequency 50Hz

Power 1kW

3 Ph N/PE

Compressed air pressure: 6 bar

A suction system must be used with this equipment.

This machine holds the CE marking in compliance with European standards.
